DOOR INSTALLATION CUT-AWAY

INSTALLATION

Cut openings for doors and windows in the wall. The door opening size required can be established from the table on the right. If you have ordered special size doors the required opening size can be confirmed by sending an email to peter@tse.co.nz

Cover wall with brick paper if required, wrapping brick paper into the opening. If you are using thick brick paper you will need to increase the size of the opening slightly to allow the door to fit.

Paint and glaze door.

Put a small amount of adhesive onto the architrave. Place door into opening from the inside face of the wall.

OPENING SIZES

The required size of the opening to be cut in a wall for a door can be established from the tables below. The opening size allows for the door plus frame. For example a 660 wide door in HO scale requires an opening 9mm wide by 23.7mm high.
